Summary

Full Stack Developer with experience delivering end-to-end features, from **scalable backend services** to **responsive UIs**. Skilled in **Node.js**, **FastAPI**, **.NET**, and **React**, with a strong understanding of **cloud deployment** and **database design**. Focused on delivering **clean code**, **fast iterations**, and **production-ready software**.

Experience

[DevShift](#) | **Full Stack Developer** | 2024–Present

A fast-paced dev agency building fullstack products using modern technologies for a variety of client needs.

- Developed backend APIs in **Node.js**, **Django** and **.NET**
- Built frontend interfaces with **React** and **Vue**
- Managed deployments with **Docker**, **GCP**, and worked with **PostgreSQL**

[Colors AI](#) | **Full Stack Developer** | 2024–2025

An AI toolset company providing a platform for businesses to customize AI agent behavior and performance through a user-friendly interface.

- Delivered backend logic in **FastAPI** and **Node.js**, integrated with **CMS**
- Created interactive dashboards in **React** to visualize agent activity
- Handled API integration, user authentication, and cloud deployment via **GCP**

[Heb Subs Premium \(Stremio\)](#) | **Creator & Developer** | 2023–Present

Developed and maintained a premium Stremio add-on that aggregates Hebrew subtitles from scrapping the web. Built independently as a paid SaaS-like service used by a growing user base.

- Developed backend with **Node.js** and frontend with **JavaScript**
- Managed entire deployment stack: **Docker**, **AWS**, **PostgreSQL**, **Grafana**
- Designed the user experience from setup to playback integration

Education

B.Sc - Bachelor of Science in Software Engineering | 2020-2024
