EDUCATION

FULL-STACK DEVELOPER

The external studies institute TESI

- I acquired knowledge in web application development
- Front-End, Back-End and DataBases.

PYTHON COURSE

UDEMY

- Datascience
- Automation
- Website Development
- Applications and Games
- Front-End, Back-End

DevSecOps Engineer

Bar-Ilan University

- Linux Systems Management
- Cloud Technologies (AWS)
- Cyber Practices
- Hands-on DevOps automation
- CI/CD

SUMMARY

DevOps Engineer with a strong background in automation, cloud infrastructure, and security best practices. Designed and implemented CI/CD pipelines, optimized cloud resource management, and improved deployment efficiency. Passionate about DevOps culture, continuous improvement, and delivering scalable, resilient systems.

TECHNICAL SKILLS

- **DevOps & Cloud:** Docker, Kubernetes, Jenkins, GitHub, AWS (EC2, S3, IAM), Terraform, Bash Scripting, Infrastructure as Code (IaC).
- **Programming & Development:** Python, Flask, Node.js, JavaScript, React.js, SQL, MongoDB
- **Web:** HTML, CSS, Chakra-ui, Bootstrap
- **Security & Automation:** Secure Coding Practices, Linux Administration, Monitoring & Logging

PROJECTS

CI/CD Pipeline for Dockerized Flask Application

- Designed and implemented a CI/CD pipeline using Jenkins for automated deployment of a Dockerized Flask application on AWS EC2.
- Integrated AWS services and Docker Hub to streamline the build, push, and deployment workflows, enhancing system reliability.

Data Processing & Excel Automation

- Built an automated data pipeline using Python, pandas, and openpyxl for data cleaning, transformation, and Excel workbook generation.
- Optimized financial data processing by reducing manual workload by 60% through automation.

LANGUAGES

- **English:** Professional working proficiency
- **Hebrew:** Native
